

New style Elcometer 124 Thickness Gauge

Due to a substantial increase in price for the existing Elcometer 124 Thickness Gauge, we have had to change the design of the gauge to remain price competitive.

With the exception of minor changes to the dimensions and weight of the gauge, the technical specification and operation of the Elcometer 124 remain unchanged.

The only noticeable difference is the shape and style of the gauge and the instrument is no longer supplied in a wooden storage case.

A plastic carry case will be made available, as an optional accessory in the near future.

TECHNICAL SPECIFICATION COMPARISON
