

Elcometer P610 Timber Metal Detector

Elcometer P610 Timber Metal Detector

At a glance

- *Designed specifically to precisely locate ferrous metal objects in timber prior to the saw mill.*
- *Stable & reliable results on wet or dry, hard or soft wood.*

Elcometer P610 Timber Metal Detector

The Elcometer P610 has been designed specifically to precisely and accurately locate ferrous metal objects - such as gate hooks, nails, staples and even shrapnel - in timber, logs and wood of all types.

Mill downtime, saw doctoring costs, and missed delivery schedules all make hitting metal in timber a very costly mistake. Buying and transporting timber to a sawmill, only to have it rejected because of metal contamination, wastes both time and money. The answer to these costly problems is the Elcometer P610.

- Auto-Zero button for exact pinpointing of the metal objects.
- Analogue meter shows the signal strength - allowing you to identify the orientation of the metal object.
- Stable and reliable results – the Elcometer P610 searches equally well through wet and dry, hot or cold, hardwoods and softwoods.
- Loudspeaker volume control and locket for headphones (for noisy environments).

Industrial Metal Detectors

Whether you are on a construction site or at the side of the road, detecting metal piping, valve boxes and manhole covers is often difficult as plans are often incorrectly drawn up or the target is hidden by debris, foliage, etc.

Timber merchants, reclamation yards and logging companies have one thing in common – their need to detect and precisely locate metal objects in the wood, before it is sent to the sawmill.

Elcometer's range of Industrial Metal Detectors have been specifically designed to meet the individual industrial requirements and will greatly reduce waste, downtime, increase your productivity and avoid catastrophes.

DIMENSIONS		
	Metric	Imperial
Main Unit	2.33 x 1.80 x 1.0 cm	0.9 x 0.7 x 0.4"
Search Head Diameter	22 cm	8.7"
Weight	850g	1.87lb
Power Supply	Internal Rechargeable Battery (supplied with charger unit)	

APPROXIMATE DETECTION RANGES		
Typical Object Type	Metric	Imperial
Gate Hook	61cm	24"
Barbed Wire – length 400mm (15.7")	36cm	14"
Staple – length 40mm (1.6")	33cm	13"
Nail – length 75mm (3.0")	33cm	13"
Nail – length 125mm (4.9")	34cm	13.4"

Model	Description	Part Number		
		UK 240V	EUR 220V	USA 110V
Elcometer P610	Elcometer P610 Timber Metal Detector with Charger	W610170H	W610170I	W610170J
Accessories	Replacement 8" Search Coil	TW610197A		

Related products

Elcometer P600

The Elcometer P600 is a small versatile instrument which is a very cost effective instrument for finding nails in timber and works equally well on all types of hard and soft wood. Designed for the Timber Reclamation Industry, the Elcometer P600 will detect and locate nails, small pieces of metal (including shrapnel) in timber of all types.

Elcometer P150

Not only can this gauge detect mild steel but with the extra detector head the gauge can also locate phosphor-bronze, copper and some types of stainless steel wall tie. The Elcometer P150 can also detect mild and stainless steel rebars, bed joint reinforcement and hoop iron. It can locate wiring in plaster walls and is also an excellent stud locator / stud detector which makes it an extremely versatile instrument.

Elcometer P130

The Elcometer P130 will rapidly and precisely locate mild steel or stainless steel wall-ties and is an excellent stud locator/stud detector, it is therefore an extremely versatile instrument.

Elcometer P520

The Elcometer P520 metal detector is very high powered for greater depth metal detection. Originally designed as a water mains locator and a pipe locator, the Elcometer P520 is also the perfect choice for location work in cluttered areas and at depths where other metal detectors simply do not work.
